

Journal Papers

Fenuta A, Hicks A (2014). Metabolic demand and muscle activation during different forms of bodyweight supported locomotion in men with incomplete SCI. *BioMed Research International*, Vol. 2014, Article ID 632765.

Fenuta A, Hicks A (2014). Muscle activation during body weight-supported locomotion while using the ZeroG. *J Rehabil Res Dev* 51(1): 51-58.

Hidler J, Brennan D, Black i, Nichols D, Brady K, and Nef T (2011). ZeroG: Overground gait and balance training system. *J Rehabil Res Dev*. 48(4):287-98.

Prosser L, Ohlrich L, Curatalo L, Alter K, and Damiano D (2012). Feasibility and preliminary effectiveness of a novel mobility training intervention in infants and toddlers with cerebral palsy. *Developmental Neurorehabilitation*, 15(4): 1-8.

Book Chapters

Hidler J, Rozaieski M, Koehler S, Ellis C, Fletcher P, Frankoff D, and Hendricks J (2009). Technology and Stroke. *Managing Stroke: A Guide to Living Well after Stroke 2nd Edition*, NRH Publications.

Hidler J and Brown D. (2012). Robotic devices for overground gait and balance training. *Neurorehabilitation Technology* (chapter 22), Edited by V. Dietz, Z. Rymer and T. Nef, Springer.

Refereed Conference Proceedings

Nef T, Brennan D, Black i, Hidler J (2009). Patient-tracking for an Over-ground Gait Training System. *IEEE 11th International Conference on Rehabilitation Robotics ICORR*, Kyoto, Japan, June 23-26.

Abstracts

Ness D. Dynamic Over-ground Body Weight Support Training in Patients with Pusher Syndrome after Stroke: Case series. *APTA Combined Sections Meeting*, February 2014.

Brady K, Black i, Brennan D, and Hidler J. ZeroG: Dynamic over-ground body-weight support system. *APTA Combined Sections Meeting*, February 2008.

Hidler J, Black i, and Brennan D. ZeroG: Dynamic Over-Ground Gait Training System. *American Spinal Injury Association (ASIA) Annual Meeting*, Tampa, FL, June 2007.
